

# Why should Rogue Developer Accounts be deleted along with fake apps?

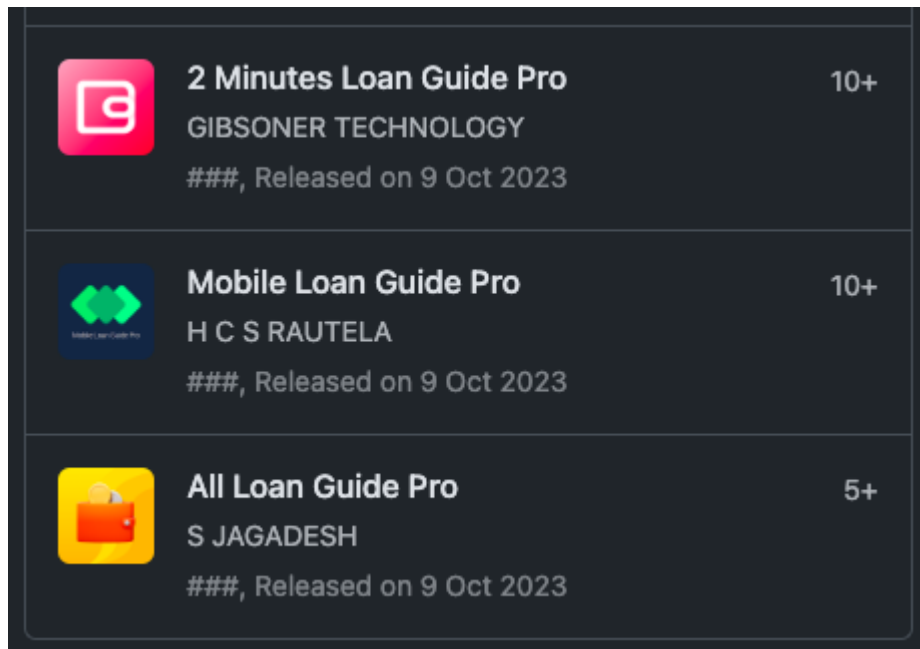

Let's understand by an example.

The following 3 apps were removed from play store on Oct 6th, 2023. They had 100K+ downloads. But their developer accounts were not deleted.

1. 2 Minutes Loan Guide:  
<https://play.google.com/store/apps/details?id=com.loantwo.minguide.helpguide>
2. Mobile Loan Guide:  
<https://play.google.com/store/apps/details?id=com.guide.loan.mobile>
3. All Loan Guide:  
<https://play.google.com/store/apps/details?id=com.phone.loanguide.allloanguide>

But on Oct 9th, 2023: All 3 developer accounts have published new apps with just changing the Logo and adding “Pro” to the name.

1. 2 Minutes Loan Guide Pro:  
<https://play.google.com/store/apps/details?id=com.twolp.minlgpro.mlgpguide>
2. Mobile Loan Guide Pro:  
<https://play.google.com/store/apps/details?id=com.guide.loan.mopro>
3. All Loan Guide Pro:  
<https://play.google.com/store/apps/details?id=com.proall.superguide.pro>

> Developer Accounts which have published fake/fraud apps earlier, can not be trusted.

> Most of the time, these accounts just have low quality apps in the name of wallpaper apps, video makers, video downloaders and girls video chat apps which are also many times a technique to scam people.

> Also, they keep publishing similar fake and low quality apps based on trending keywords, trying to trick the play store search results. In turn, if a user happens to download such apps, they either face a scam or have a bad experience.

***So, while deleting the reported fake apps, the entire developer account along with all other apps in that account, needs to be deleted permanently.***
